## In the claims:

1. (Previously amended) Compounds of formula I

wherein the compounds are not fully alkylated, in that at least one R<sub>1</sub> group is H and the remaining entire 11 or fewer of 11 R<sub>1</sub> groups are CH<sub>2</sub>CO<sub>2</sub>K; R<sub>2</sub> is

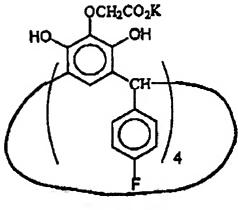

and L is H.

2. (Original) A compound of formula I as claimed in claim 1 where 4 to 8 of  $R_1$  are  $CH_2CO_2K$ , the remaining  $R_1$  substituents are H,  $R_2$  is

and L is H.

3. (Original) A compound of formula II

Formula II

- 4. (Previously amended) A mixture of compounds of formula I of claim 1, wherein the compounds have different degrees of alkylation in that the number of R<sub>1</sub> groups that are CH<sub>2</sub>CO<sub>2</sub>K independently ranges from 1 to 11 for each compound in the mixture.
- 5. (Cancelled).
- 6. (Cancelled).
- 7. (Previously amended) A pharmaceutical composition comprising a pharmaceutically effective amount of a compound of formula I of claim 1 or formula II of claim 3, together with a pharmaceutically acceptable carrier or diluent.
- 8. (Original) A pharmaceutical composition comprising a pharmaceutically effective amount of a mixture of compounds according to claim 4, together with a pharmaceutically acceptable carrier or diluent.
- 9. (Original) A pharmaceutical composition comprising a pharmaceutically effective amount of a compound as claimed in any one of claims 1 to 3 or a mixture as claimed in

**PATENT** 

Attorney Docket No.: TOMK-0001 (122359.00003)

• • •

claim 4, together with an anti-viral agent and a pharmaceutically acceptable carrier or diluent.

- 10. (Cancelled).
- 11. (Cancelled).
- 12. (Currently amended) A method of treatment of viral HIV-1 infection comprising administering to a patient a pharmaceutically effective amount of at least one compound of formula I of claim 1 or formula II of claim 3.
- 13. (Currently amended) A method of treatment of viral HIV-1 infection comprising administering to a patient a pharmaceutically effective amount of a mixture of compounds of formula I of claim 1 wherein the compounds have different degrees of alkylation in that the number of R<sub>1</sub> groups that are CH<sub>2</sub>CO<sub>2</sub>K independently ranges from 1 to 11 for each compound in the mixture.
- 14. (Currently amended) A method of treatment of viral HIV-1 infection comprising administering to a patient a pharmaceutically effective amount of at least one compound of formula I of claim 1 or formula II of claim 3 or a mixture of compounds of formula I of claim 1 wherein the compounds have different degrees of alkylation in that the number of R<sub>1</sub> groups that are CH<sub>2</sub>CO<sub>2</sub>K independently ranges from 1 to 11 for each compound in the mixture, together with an anti-viral agent.

Claims 15 - 18. Cancelled.
